

Jemsek Corporation

No. of vehicles: 7

“Our main business concern for availing FASTrack SE is to avoid losses. We once fell victim to highway robbery a.k.a., hijacking and it’s an open fact that authorities would only be obliged to act if provided with leads. God forbid, but if this crime will be committed again, we will have a very good chance of recovery or better yet, apprehension.

Initial calculations on time were evident on their usual trip stoppage. An hour or more of usual stoppage was reduced to 20 minutes, many times now they don't stop at all. On fuel savings, we initially calculated a 10 to 15 percent savings on the first month and a half. Excessive engine idling with the aircon running was prevented because now we knew when the vehicle was parked or stopped. These will stretch vehicle life and translate to savings on maintenance cost.”
